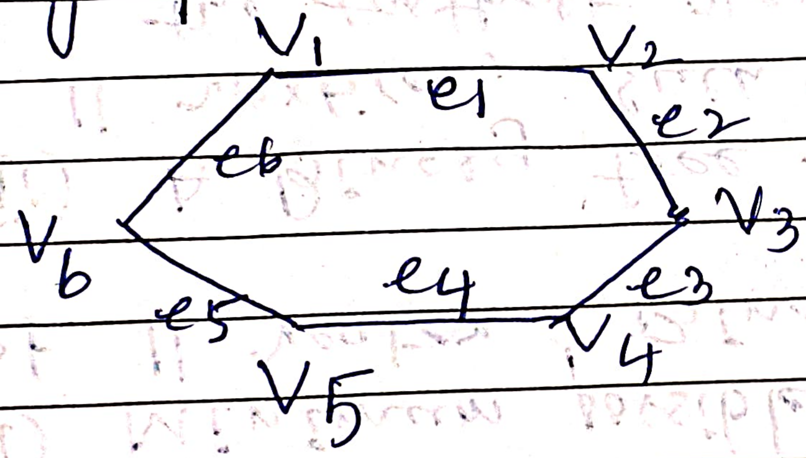
DATE : ..../......./.............

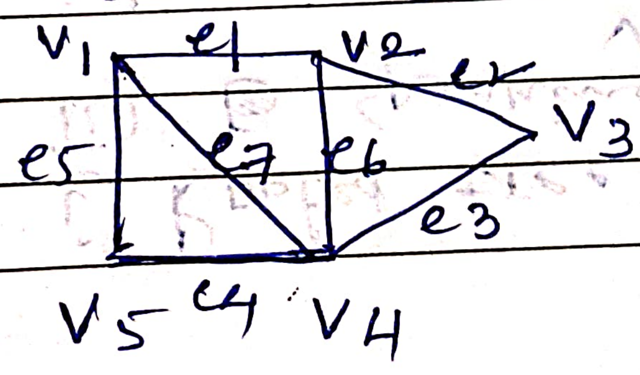
1. Distinguish between Edge Connectivity and Vertex Connectivity.

2. Find edge Connectivity and the Vertex Connectivity of the graph



3. find the Vertex partition Caused by the following cutset

i) $C_1 = \{e_2, e_3\}$ ii) $C_2 = \{e_1, e_3, e_6\}$.



4) Define i) Rooted tree
ii) Spanning Tree.
iii) Cut Edge
iv) Cut Vertex.
v) Cut Set.

5. Construct
i) Minimum possible height of 11 Vertex Binary tree

ii) A Binary tree for a given 11 vertices, such that the farthest vertex is as far as possible from the root that must have exactly 2 Vertices at each level except at zero level.

(Hint Binary tree mean One Vertex With degree 2 all other with degree 1 or 3.
